DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 52-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 52 has no proper antecedent for "said reflection type light valve side" or "said illumination unit side".

3. Claims 52-55 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

The omitted structural cooperative relationships are: There is no structural relationship for the "space shutoff from the cooling air". As presented it is not apparent what function this space serves because there is no recitation of what this space contains.

Art Unit: 2851

Also, there is no structural relationship presented for the relative locations of the light valve and the illumination unit.

The claims should be amended to more fully set forth the structure of the elements so as to describe a functional apparatus.
